

# Susan's Story

- I struggled in school and tried college but had to drop out because I missed too many classes and couldn't get along with my roommate.
- Unemployed, I began abusing drugs and alcohol.
- I was later hospitalized and diagnosed with Bipolar Disorder.
- I was admitted to Keystone's Group Home.
- They helped me to manage my symptoms and follow doctor's orders on taking medication.
- In a year I moved to my own apartment and now receive services from Keystone's Supported Apartment Program.
- I have learned money management and how to keep a house clean and prepare meals.

Thank you Keystone!

Susan
